Anti-Saloon League Officials Favor Placing Skull and Cross Bones on Bottles.

Death's emblem-the skull and cross nes-and the word "poison" will grace the exterior of every receptacle of intexicants in the District of Columbia in the near future if plans being considered by officials of the Anti-Saloon League of the District materialize.

William Anderson, superintendent of the Anti-Saloon League of New York, the Anti-Saloon League of New York, purposes to have a bill providing for the treating of all intoxicating drinks containing more than 2 per cent of alcohol as poisons introduced into the legislature of New York State. It is the Anderson proposal that local temperance officials are considering. They agree with Mr. Anderson's declaration that whisky, beer, and similar spirits are poison and should be treated as such Favors Anderson Proposal.

"There is a law providing for labels on carbolic acid and other deadly drugs. Why shouldn't there be similar provisions made for the treatment of intoxicants?" said Andrew Wilson, president of the local league, today. "Science has conclusively proved that alcohol is as poisonout as can be. It is the cause of more degeneracy, crime and disease of more degeneracy, crime and disease than anything else known to man. Why should not the drinkers of intoxicants be ever confronted with the nature of the stuff they are about to put into their systems?

"I am heartly in favor of a law along the lines proposed by Mr. Anderson. The matter will be taken up officially at the next meeting of the leasure."

at the next meeting of the league."
Miss Georgia Robertson, prominent as
a temperance worker, also heartily indorses the Anderson proposal. Poison Label Is Urged.

"If men and women are made to realize that they are drinking poison they will soon cut down their draughts or abstain altogether from the drugs said Miss Robertson. "Place a skull and cross bones label on every bottle of whisky and every bottle of beer and you are doing humanity a great service. "Statistics prove that most of the crime and disease of the world is the result of the use of naccotics. Whisky is a narcotic stimulant of the worst sort. It is a habit forming drug. Why shouldn't it be labeled as are other poisonous drugs? We certainly will have legislation providing for such treatment of intoxicants eventually, and the sooner we start out to get it the better for the race." realize that they are drinking poison
